

22 December 2021

Respected Colleague,

International Training Network (ITN) Centre of Bangladesh University of Engineering and Technology (BUET) is inviting Research Proposals for funding in any of the following topics:

- Technologies and innovations in fecal sludge management (FSM), decentralized wastewater treatment (DWWT) and integrated solid waste management (SWM)
- Innovations and advancement for citywide inclusive sanitation (CWIS), including FSM Gender, social, climate change, and emergency/disaster issues
- Waste-to-energy, recycle and re-use involving fecal sludge and solid waste
- Developing innovative business and service-delivery models for CWIS

ITN-BUET seeks to promote high quality research collaboration between academia, research institutions and professionals working in the sanitation sector in Bangladesh. Interested faculty members/researchers from BUET, ITN-BUET partner academic institutions and research institutes are eligible to submit their proposals as the Principal Investigator of the research project. For proposals having the Principal Investigator from a partner academic institution or research institutes, at least one co-investigator has to be from BUET.

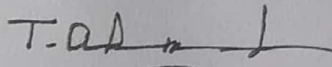

The application procedure and evaluation process are detailed in the link (<https://itn.buet.ac.bd/web/research-project-fund/>).

You can also scan the following QR code to visit the link.

For any queries, please do not hesitate to communicate through email (Email Address: alauddin@itn-buet.org).

We hope to receive exciting proposals from you.

Best regards,

Dr. Tanvir Ahmed
Director, ITN-BUET
and
Professor of Civil Engineering, BUET

22 December 2021

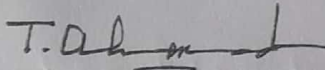

Respected Colleague,

I am pleased to announce that ITN-BUET will be offering fellowships to students who are pursuing a graduate degree in various Departments/Institutes in BUET and working on problems related to environmental sanitation, water supply and waste management. The objective of the fellowship is to expand the potential professional base in the field and encourage them to solve long-standing environmental challenges. The fellowship amount will be BDT 30,000/month and will be awarded to a student for a tentative period of 6 months, subjected to terms and conditions. Students who are working on cross-cutting elements with other disciplines, such as planning, management, and social sciences, are specially encouraged to apply.

The application procedure, criteria and requirements for the fellowship are detailed in the following link: <https://itn.buet.ac.bd/web/postgraduate-research-fellowship/>. You can also scan the following QR code to visit the link.

I hope you will encourage the students of your Department/Institute to apply for the fellowship.

Best regards,

Dr. Tanvir Ahmed
Director, ITN-BUET
and
Professor of Civil Engineering, BUET
